READERS' CHOICE AWARDS

The Operators' Best Friends

Software and systems competencies are fine, but operators have to have the means of seeing what is going on, understanding what they see, and easily controlling the process they're running. In this group of Readers' Choice Awards, we find companies that have consistently demonstrated expertise in hardware design and manufacturing. Some of these companies, such as Ametek Panalarm, Watlow Electric, Federal Signal and others, have been doing what they

do for a long time. Emerson, GE, Honeywell, Yokogawa and Rockwell each bring over 100 years' experience in effectively communicating process conditions to operators.

Interesting changes in this year's list: Advantech took the Industrial Computer category, Invensys Operations Management surged in the Process Loop Controller category, and Rockwell once again took the Operator Interface Terminal and Panel Display categories.

Operator Interface Terminal

★ Rockwell Automation

2. Siemens Industry
3. Honeywell Process Solutions
4. GE Intelligent Platforms
5. Emerson Process Management
6. Pro-face America
7. Maple Systems
8. Daisy Data Displays

Look at this!!!
Maple Systems
ranks in the
top 7 for OITs!!
