

# Maple Systems Launches Easy EasyAccess 2.0

NOVEMBER 16, 2016 BY LESLIE LANGNAU — LEAVE A COMMENT

EasyAccess 2.0 is a remote supporting service that accesses Maple Systems HMIs and connected PLCs from anywhere in the world. EasyAccess 2.0 integrates with a variety of displays including laptops, desktop PCs, smart phones, and tablets, making it easier to connect to equipment in the field.

Accessibility from devices outside the plant helps OEMs and systems integrators add new features to a Maple HMI without leaving company headquarters. The ability to remotely troubleshoot and reconfigure the HMI/PLC can greatly **reduce down time, travel, and associated personnel costs**. EasyAccess 2.0 offers increased monitoring mobility, secure remote connections, and the ability to increase an organization's bottom line.

Maple Systems Inc.
