MAPLE SYSTEMS ADDS WINDOWS EMBEDDED CE 6.0 TO OPENHMIS

[VIEW COMPANY WEBSITE](#)

March 7, 2013 - Maple Systems introduced three new models pre-loaded with the Microsoft Windows Embedded CE 6.0 operating system. The display sizes- 7" OMI5070B-CE, 12.1" OMI5121A-CE, and 15" OMI5150A-CE- include touchscreens housed in a sleek aluminum enclosure resistant to corrosion. Each model supports serial, Ethernet, USB connections, and an SD slot for storing data.

Several useful apps, including viewers for Word, Excel, PDF, and PowerPoint documents are pre-installed as well as a media player and web browser. For customers who do not

wish to create their own Windows CE application, Maple Systems also provides the InduSoft Web Studio SCADA software that is a perfect complement to the OpenHMI hardware.

All of the OMI5000 Series are NEMA4 (IP65) rated and carry both CE and RoHS certification. These models are also UL listed for both US and Canada. The 7" OMI5070B-CE model has an extended operating temperature range of -20°C ~ +50°C (-4°F ~ 122°F).

PROFINET Does That.
