## Maple Systems HMI control for smart factories

Print Email G+1 in Share

Two smart factory HMIs have been added to the cMT HMI line to enable control and monitoring of the HMI from Windows PCs as well as from Apple/Android smart phones and tablets. The two "smart HMI" models include a display-less HMI (cMT-SVR) and a 15-in touchscreen HMI (cMT5151) with such features as trending, recipes and alarms. The models are IIoT-ready and support the MQTT, OPC UA Server, MySQL and Modbus Gateway protocols.

Category: Operator Interface Hardware  
 Product Type: Maple Systems  
 Manufacturer: Maple Systems
