PROMOTING EXCELLENCE IN PROCESS AUTOMATION • CONTROLGLOBAL.COM

*And the
Winners are...*

The Usual
Suspects Win the
**Readers' Choice
Awards!**

The question isn't who won, but rather why do they win and how do they do it.

Seeing What's Going on Here

Operators have to be able to see what is going on in their processes, and they need highly effective and highly reliable ways to do that. The companies on this list (Table 4) are highly competent at hardware design and manufacturing, and many of them have been doing what they

are being recognized for a very long time. Emerson, GE, Honeywell, Yokogawa, Invenio Operations Management and Rockwell Automation have over 100 years' experience in communicating process conditions.
