Maple Systems Kicks off its 30-Year Anniversary with New Products!

July 10, 2013 [Stacy Combest](#) : 0 Comments

[Maple Systems](#), the provider of Human Machine Interfaces (HMIs) celebrates 30 years of outstanding products and service this year. As a part of their year-long recognition of this pinnacle, they are introducing a number of innovative products, adding new models to our most popular product lines, and incorporating substantial upgrades.

HMI5000HD
HDMI
HIGH-DEFINITION MULTIMEDIA INTERFACE

The newest addition to our operator interface family is the HMI5000HD, a first of its kind for Maple Systems! This innovative HMI can utilize any LCD television or monitor [via HDMI connection] to create a sophisticated visualization center for operational monitoring. The HMI5000HD supports a varied selection of input devices to produce machine interface capability to almost any available display, and supports the most common communications protocols. The HMI5000HD brings unparalleled flexibility, safety and affordability to your operation today. The HMI5000HD will also be available for purchase on July 8, 2013.

The next is a new addition to our graphic HMI line, the HMI5000L. These exciting additions to our very popular HMI5000 line provide a formidable array of features and a fresh new look housed in an ultra-slim profile, and are particularly well suited to tough conditions. The versatile "L" models are available in 7" and 10" screen sizes and are backed by RoHS, IP65/NEMA4 and cULus Certification. The HMI5000L will be available for purchase on July 8, 2013.

Finally, Maple Systems announces upgrades to its entry-level Panel PCs, the PC110 Series. The available RAM in both PC110 models is now 1GB while the capacity of the hard drives in these units has been significantly increased to 250GB – all at no additional cost.
