Read/Post Comments

Maple Systems (Everett, WA) has introduced a revolutionary new product called the HMC (Human Machine Controller). The HMC is cost effective, efficient, and compact, combining an HMI and PLC into one unit. Simply put, HMC=HMI+PLC. Features include:

- Acceptance of up to five plug-in I/O modules with varying configurations of digital and analog inputs and outputs.
- A 3.5-inch or a 5.7-inch touchscreen display.
- A Class I Division 2 rating and cULus, NEMA 4, CE, and RoHS certifications.

For more information visit www.maplesystems.com.

Gigabit Technology

- ARM-based
- System on a Chip
- Gigabit Ethernet
- Small, Cheap, Fast
- Both QFP and BGA Packages
- Standard Development Tools
- 10 Year Life Guarantee
- Royalty Free RTOS, TCP/IP V4/6
